Education

Madan Mohan Malaviya University of Technology, B.Tech. in Information Technology Expected May 2025

- CGPA: 6.92/10
- **Coursework:** Operating System | Database Management System | Computer Network | Data Structures and Algorithms | Object Oriented Programming | Python

Projects

Advanced RAG-Based Chatbot

[Live](#) | [Code](#)

- Built a **RAG chatbot** for document-based Q&A, supporting multiple file formats.
- Integrated **Groq API** for LLM inference, allowing users to provide their own API key.
- Designed a **state-based execution flow** using **LangGraph**, including:
 - **Response Generator** – Generates LLM-based answers.
 - **Evaluator** – Assesses quality and refines answers if needed.
 - **Refinement Block** – Improves responses before presenting to users.
- Deployed on **Hugging Face Spaces** with a user-friendly **Streamlit** interface.
- **Tools Used:** Python, LangChain, LangGraph, FAISS, BM25, Groq API, Streamlit

Text Summarization Using BART

[Live](#) | [Code](#)

- Fine-tuned **facebook/bart-large-cnn** on **Samsam** for conversational text summarization.
- Deployed using **Gradio** on **Hugging Face Spaces**.
- **Tools Used:** Python, Hugging Face Transformers, BART, Gradio, Hugging Face Spaces

Multiple Disease Prediction System

[Live](#)

- Built an **ML-based prediction system** for **diabetes & heart disease**.
- Developed an interactive **web app** using **Streamlit**.
- Deployed on **Streamlit Cloud**.
- **Tools Used:** Python, Scikit-Learn, Pandas, NumPy, Matplotlib, Streamlit

Experience

Intern, Internet of Things (IoT), Emertxe Information Technologies

July – Sept 2024

- **Trained in C programming** and **microcontroller-based development**.
- **Built a home automation simulation** using **PICSimLab**.
- **Gained hands-on experience** in **IoT project development** and **Software Development Life Cycle (SDLC)**.

Achievements

- **GATE Data Science & AI 2025 Qualified**
- Solved 500+ **DSA Problems** on [LeetCode](#)

Technical Skills

Languages: Python | C | C++

Machine Learning & Deep Learning: ML | DL | TensorFlow | Hugging Face Transformers

NLP & LLMs: LangChain | LangGraph | RAG | Transformer Fine-tuning (Mistral, Llama, BART, etc.) | FAISS | BM25

Data Analysis: Pandas | NumPy | Scikit-Learn

Data Visualization: Matplotlib | Seaborn

Algorithms: Data Structures and Algorithms (DSA)
