SUMMARY

Full-Stack Developer with hands-on experience building secure, scalable web applications using Django and PostgreSQL. Specialized in healthcare technology with medical imaging workflows (DICOM), authentication systems, and real-time data dashboards. Proficient in REST API design, database optimization, and deploying production-ready solutions on AWS with strong performance and security.

EDUCATION

M.M.M University of Technology, Gorakhpur, Uttar Pradesh

2022 - 2025

Bachelor of Technology in Information Technology - CGPA - 7.3

PROFESSIONAL EXPERIENCE

Glocal Digital Private. Limited.

Aug 2025 – Jan 2026

AI Engineer (Full-Stack Development)

Maula Ali Hyderabad, Telangana

DICOMSecure 🔗 | Django, Django REST Framework, PostgreSQL, React.js

- Architected and developed a secure medical imaging platform with Django REST Framework APIs handling daily user requests for CT, MRI, and X-Ray report access with role-based authentication
- Developed interactive DICOM viewer backend APIs supporting zoom, pan, windowing, measurements, and multi-slice navigation with RESTful endpoints for real-time image manipulation
- Integrated PDF generation service using ReportLab to export DICOM images and medical reports with patient metadata, enabling seamless record management
- Deployed on AWS EC2 with Gunicorn and Nginx reverse proxy, configured PostgreSQL with automated daily backups using cron jobs and implemented connection pooling for scalability

Attendance Tracker and Report Installation System 🔗 | React.js, Django, SQLite

- Developed attendance management system with Django REST Framework, JWT authentication, and RBAC for multiple user roles
- Built real-time dashboards using Django ORM aggregations and optimized queries
- Integrated automated report generation with pandas/openpyxl for PDF/Excel exports with custom date filters

DevLogger(Self Made) (Code) | Django, PostgreSQL, React.js, GitHub API

- Designed and developed a full-stack developer dashboard using React and Django REST Framework.
- Integrated GitHub APIs to sync repositories, commits, contributions, and analytics for authenticated users.
- Built features including journaling with Markdown support, coding activity tracking, goals, skills, and code snippets.
- Implemented secure authentication and optimized API integration using Axios to ensure smooth data fetching and a responsive user experience.

TECHNICAL SKILLS

Programming Languages: C++, Python, SQL, JavaScript

Data Science & Visualization: NumPy, Pandas, Matplotlib,

Web Development: React.js, Django, Flask

Databases: PostgreSQL, SQLite, ORM Queries, MongoDB

Cloud & DevOps: AWS (EC2, S3), Git, GitHub

Relevant Coursework: Data Structures & Algorithms, Database Management Systems, Object-Oriented Programming

ACHIEVEMENTS & CERTIFICATIONS

- Solved 400+ **Data structures and algorithms problems** across LeetCode, GeeksforGeeks, and HackerRank with focus on optimization and complexity analysis
- Earned **5-Star Problem Solver badge on HackerRank** demonstrating consistent excellence in competitive programming and algorithmic thinking
