SUMMARY

AI Engineer / Full-Stack Developer with experience building healthcare-focused platforms using Django, PostgreSQL, and AWS. Skilled in REST APIs, medical imaging workflows, and GenAI projects with strong problem-solving ability.

EDUCATION

M.M.M UNIVERSITY OF TECHNOLOGY, GORAKHPUR, UP

2022 - 2025

B.Tech - CGPA - 7.3

PROFESSIONAL EXPERIENCE

Glocal Digital Private. Limited.

Aug 2025 – Jan 2026

AI Engineer (Full-Stack Development)

Maula Ali Hyderabad, Telangana

DICOMSecure 🔄 | Django, Django REST Framework, PostgreSQL, React.js

- Developed interactive DICOM viewer backend APIs supporting zoom, pan, windowing, measurements, and multi-slice navigation with RESTful endpoints for real-time image manipulation
- Integrated PDF generation service using ReportLab to export DICOM images and medical reports with patient metadata, enabling seamless record management
- Deployed on AWS EC2 with Gunicorn and Nginx reverse proxy, configured PostgreSQL with automated daily backups using cron jobs and implemented connection pooling for scalability

PROJECTS

Diabetes Risk Analysis (Code) | Python, Pandas, NumPy, Matplotlib, Seaborn, Scikit-learn

- Performed exploratory data analysis on a healthcare dataset of 768 patient records to identify diabetes risk factors.
- Cleaned data by handling invalid zero values and imputing missing entries using median-based strategies.
- Identified Glucose, BMI, and Age as key predictors supporting data-driven healthcare insights.

Medical PDF Chatbot (Code) | Python, Streamlit, LangChain, HuggingFace Embeddings, Groq LLM

- Built a Retrieval-Augmented Generation (RAG) medical chatbot that answers user queries strictly from uploaded PDF documents.
- Generated semantic embeddings using sentence-transformers, stored them in a FAISS vector database for fast similarity search.
- Integrated a Groq-hosted LLM with prompt engineering to minimize hallucinations.

TECHNICAL SKILLS

Programming Languages: C++, Python, SQL, JavaScript

Data Science & Visualization: NumPy, Pandas, Matplotlib, Scikit-learn, Tensorflow,

Generative AI: Large Language Models, RAG Systems, Transformers, LangGraph, LangChain, CNN, RNN

Web Development: React.js, Django, Flask, Streamlit

Cloud & DevOps: AWS (EC2, S3), Git, GitHub

Relevant Coursework: Machine Learning, Deep Learning, Data Structures & Algorithms, DBMS, OOPs

ACHIEVEMENTS

- Solved 400+ problems on coding platforms like LeetCode, GeeksforGeeks, and HackerRank.
- Earned 5-Star Problem Solver badge on HackerRank, for proficiency in problem-solving.
- Participated on LeetCode with monthly badges, showcasing consistent problem-solving and competitive programming skills.

SOFT SKILLS

- Time Management
- Quick Learner
- Problem Solving
- Team Work
