SUMMARY

Results-driven Python Developer with hands-on experience in full-stack web development. Experienced in designing secure Django REST APIs, optimizing PostgreSQL databases, and deploying scalable applications on AWS. Skilled in performing exploratory data analysis (EDA), data preprocessing, and business insight generation using Python to support data-driven decision-making.

EDUCATION

M.M.M University of Technology, Gorakhpur, Uttar Pradesh
Bachelor of Technology in Information Technology - CGPA - 7.3

2022 - 2025

PROFESSIONAL EXPERIENCE

Glocal Digital Private. Limited.
AI Engineer (Full-Stack Development)

Aug 2025 – Jan 2026
Maula Ali Hyderabad, Telangana

DICOMSecure | Django, Django REST Framework, PostgreSQL, React.js

- Built a secure medical imaging platform with RBAC for CT, MRI, and X-Ray report access
- Developed REST APIs for DICOM image processing with viewer features
- Generated automated PDF reports using ReportLab to export DICOM images with patient metadata
- Deployed on AWS EC2 with Gunicorn and Nginx, optimized PostgreSQL with connection pooling, and automated backups via cron

PROJECTS

Customer Churn Analysis & Business Insights | Python, Pandas, NumPy, Matplotlib, Seaborn

- Performed EDA on 7,043 telecom customer records with data cleaning and categorical feature transformation
- Analyzed churn patterns using statistical aggregation and visualization to identify high-risk customers
- Identified key churn drivers and lack of value-added services
- Built data visualizations and analytical reports to communicate churn insights and support data-driven retention strategies

Diabetes Risk Analysis | Python, Pandas, NumPy, Matplotlib, Seaborn, Scikit-learn

- Performed exploratory data analysis (EDA), handling missing clinical values and data preprocessing
- Applied feature scaling and statistical analysis to identify key diabetes risk factors.
- Engineered patient segmentation and prepared a machine-learning-ready dataset for predictive modeling
- Built data visualizations and analytical insights to support early diabetes risk detection and data-driven healthcare decisions

TECHNICAL SKILLS

Programming Languages: Python, C++, SQL, JavaScript

Data Science & Visualization: NumPy, Pandas, Matplotlib, Seaborn, Scikit-learn

Deep Learning: CNN, RNN, LSTM, Transfer Learning, NLP

Generative AI: LLMs, RAG Systems, Transformers, Prompt Engineering, LangChain, LangGraph

Web Development: React.js, Django, Flask, REST APIs

Databases: PostgreSQL, SQLite, ORM Queries, MongoDB

Cloud & DevOps: AWS (EC2, S3), Git, GitHub

Relevant Coursework: Data Structures & Algorithms, Database Management Systems, Object-Oriented Programming, Machine Learning

ACHIEVEMENTS & CERTIFICATIONS

- Solved 400+ **Data structures and algorithms problems** across LeetCode, GeeksforGeeks, and HackerRank with focus on optimization and complexity analysis
- Earned **5-Star Problem Solver badge on HackerRank** demonstrating consistent excellence in competitive programming and algorithmic thinking
